## Summary

A young but ambitious programmer with two years of programming experience. I have a desire to improve my skills in programming and other similar areas while actively moving up the career ladder. I systematically practice at home, trying to improve my skill whenever possible. Able to adapt to any situation, can easily get along in a team, and are able to communicate with colleagues if necessary. At the moment i'm vividly going deeper in Web-developing field by learning Frontend and Backend.

About my skills...

- 1) Haven't bad knowledge in HTML5
- 2) Know CSS & CSS3
- 3) Kinda big experience working with pre-processor like SCSS
- 4) Big knowledge in Java Script
- 5) Also, a lot practical experiences in Java Script framework like jQuery
- 6) Basic worked experience with CSS libraries as Bootstrap 3&4
- 7) Possible work in version system control git like github and bitbucket
- 8) Really strong knowledge in C# language
- 9) Mediocre skills in C++, basically amateur
